Subject: Reference Letter for River View Construction, Inc.

Dear Gregory,

This letter is written as both a thank you and as a testimonial for River View Construction's work on the Diamond Youth Shelter. I do not often have the opportunity to write such a letter at the end of a publicly bid project, given the generally contentious nature of client-contractor relations in such situations. In this instance, the Diamond Youth Shelter project was completed without any such complications. I am sure that the entire Larkin Street construction team shares my appreciation for your firm's efforts in responding to the client's concerns, the normal exigencies of a construction project, schedule complications out of your control, and especially the budget. And with all of that, the standards of quality were kept high throughout the process.

I look forward to future opportunities to work with River View Construction. Please feel free to copy this letter to your potential clients and to have them call me if I can provide any additional information.

Very truly yours,  
GLASS ASSOCIATES, INC.

William R. Glass, FAIA, LEED® AP
