To Whom It May Concern,

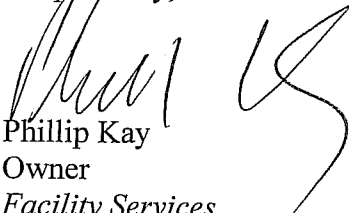

Facility Services is a small construction management firm specializing in Public Works. We have been working with the Fairfield-Suisun Unified School District for the past 6 years and in that capacity had the pleasure of working with River View Construction.

River View Construction was the responsible low bidder on the District's Rodriguez HS Concession Stand project. The project involved constructing a new concession stand with two complete bathrooms in a relatively short timeframe. In addition, the execution of the work took place simultaneously with another project with a different GC with which River View's project had to connect. River View performed well on the project showing an impressive commitment to the job, working late and on weekends when needed, taking owner-generated changes in stride, and finishing the work within the time and budget constraints set forth by the District.

Based on my experience, I would not hesitate to recommend River View Construction for any project that they felt they could take on and would be happy to see them again as the low bidder on any future project.

Please feel free to call if you have any questions,

Respectfully,

Phillip Kay
